MMU is challenging but a very interesting university. It requires someone who is willing to learn and gain knowledge. Although it took me two semesters to know the technique on how to make the studies easy, eventually, the entire experience gives me great feelings. For me it's an achievement to be able to focus well on the coursework, which makes it easier when the final exam comes. No pain, no gain. I love MMU.

I like the university as it's a melting port of different countries and nationalities. The friendliness and warmth of the study atmosphere are satisfying and has helped me value my study time. You will always find joyful and amazing events after your hard study day and stressful assignment weeks. And yes, you will have so much fun as I do when studying in MMU.

MMU has really stretched me physically, mentally and emotionally. Each and every subject is fashioned to push your mental capabilities. Taking up a student leadership role directly improved my time management and teamwork skills. Being so far away from home, has its cons but the lifestyle of campus helped me realize and focus on the pros instead. I will never forget all the friends I have made here, like lessons I have learnt and most importantly the academic excellence MMU has offered me.
